dox42 NINTEX UDAs Installation

1) Download the dox42 NINTEX User Defined Workflow Actions from:

http://www.dox42.com/WorkflowUtils.aspx

2) Copy the Icons for the Actions to this folder on your SharePoint 2010 Server:

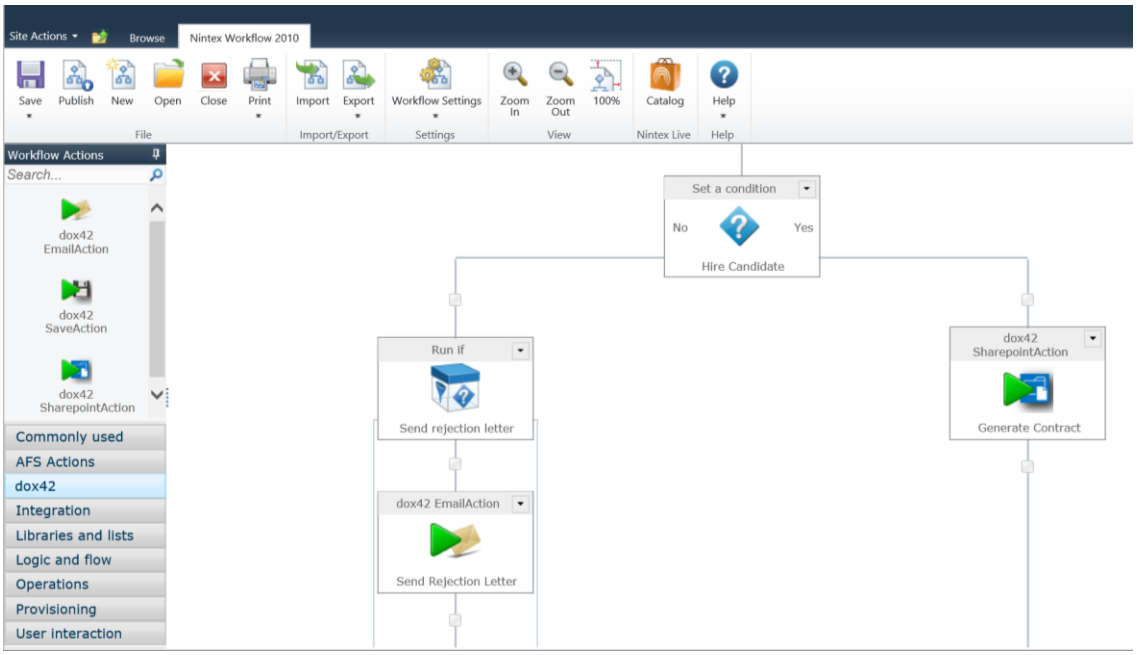
```
C:\Program Files\Common Files\Microsoft Shared\Web Server
Extensions\14\TEMPLATE\LAYOUTS\NINTEXWORKFLOW\Images\dox42UDAs\*.png
```

For SharePoint 2013 use:

```
C:\Program Files\Common Files\Microsoft Shared\Web Server
Extensions\15\TEMPLATE\LAYOUTS\NINTEXWORKFLOW\Images\dox42UDAs\*.png
```

3) Import the UDAs to your SharePoint Site:
Site Actions > Nintex Workflow > Manage User Defined Actions > Import

Now you can use the dox42 Nintex Actions like native NINTEX Workflow Actions in the NINTEX Workflow Designer:



Please find the documentation of the action parameter in the dox42 Server documentation (Download from: http://www.dox42.com/dox42Server.aspx). Each dox42 NINTEX Workflow Action is equivalent to an OutputAction of the dox42 Server.

Software Requirements:

- NINTEX Workflow 2010 or 2013
- dox42 Server
